IT'S TIME TO MOVE TOWARD THE GREEN CHOICE

our history dates back to more than thirty years ago in a small mountain village in Northern Italy. our passion for winter sports and the will to spend days on the highest peaks inspired us to create the perfect gloves for every winter condition. Now, this is at risk. Climate change is getting more and more undeniable. The impact of modern production processes is not sustainable anymore, and we cannot wait without doing our part.

our goal is to become a leader company in terms of sustainability in the winter sport market starting from now and improving step by step in the coming years. This objective to be reached without losing the performance in our products. As of today, we have implemented the sustainability of our products, introducing new recycled materials, changing design techniques and removing plastics from shipping and packaging. This on top of the long lasting and quality approach that Level follow since the beginning; Level is known to be high quality and one the most durable brands in the market; The long lasting product cycle means responsibility for the environment: Level products are made to last from 3 to 4 times longer than the average product on the market.

We use leather and fabrics coming from certified suppliers. This is central to making sure that the final product doesn't carry with it a negative footprint. Gloves' palms are now almost fully PVC free. More than 80% of our products are produced without the use of non-reusable plastic. We design our newest products with natural cloth, such as Swiss wool, merino wool and silk. Also, we switched to PFC-free treatments for our gloves. PFCs are a wide range of man-made chemicals used to waterproof outdoor equipment.

Last season Level introduced the first fully sustainable model, the Animal Junior which is made with only recycled materials, making it our milestone and the perfect green choice for many young skiers. For this upcoming season, we developed several new models to upscale the range of recycled products and increased the use of organic materials. We are proud to announce that in the collection 23-24 one third of the collection bears the "GREEN CHOICE" logo being at least 50% of the main components made from sustainable materials, either recycled or organic.

The path to becoming a green company can't be walked alone. We are working to establish a network of Green Dealers. We want that our effort doesn't stop at the production and product process. The Circular sustainable circle includes distribution and retail and we support these guidelines to make the entire process sustainable. Athletes and skiers are already onboard and working with us to sponsor a green approach to winter sports. The strength of our community is one of the many reasons why behaviours are changing. This is leading to a closer collaboration with NGOs and environmental organisations. We pledged to help Stelvio National Park with activities on site. Also, we are now partnering with Save Soil, a movement funded by Indian guru Sadhguru that strongly advocates the need of change in people consciousness and behavior towards a sustainable world.

WE MADE THE GREEN CHOICE, NOW IT IS YOUR TURN TO GET ONBOARD.

SUSTAINABLE PRODUCT. SUSTAINABLE PRACTICE.

CONSCIOUS MATERIALS

RECYCLED AND ORGANIC fabrics are now used in more than a third of our W23/24 collection. Certified fabrics suppliers like oekotex and Bluesign guarantee the chemical conformity of the fabrics; GRS certifies the content of recycled materials in the products.

LEVEL PRODUCTS are made with materials coming from certified PFC-free suppliers and do not have any PVC material in the palms.

LEVEL GREEN CHOICE models are either made by organic or/and recycled materials for more than 50%, including membranes and linings. We use recycled cardboard and paper to pack, ship and display our gloves.

DURABILITY

WE GO BACK 30 YEARS.

Since the first day, we wanted our gloves to last longer than others.

SMART BUY.

A longer life span encourages a greener attitude and discourages fast fashion.

DESIGN MUST BE RESPONSIBLE.

our gloves are designed to perform in different conditions without replacing them.

COMMUNITY

TOGETHER WE ARE STRONGER.

our skiing community works together to tackle climate change.

YOUNG CLIMATE CHAMPIONS.

We collaborate with ski schools to involve young skiers in clean-up sessions.

FOCUS ON THE SOIL

We partner with Save Soil Movement to propel their message in our community.

UNIQUE VALUES

THERMOPLUS GUARANTEES WARM HANDS

Choosing the appropriate material for the construction of gloves and mittens is of great importance in order to achieve ergonomic comfort and high thermal insulation. The thermal insulation and moisture management of LEVEL products is created through the use of different specific materials. These materials have been tested in both a climatic chamber and in outdoor conditions using wireless sensors combined with infrared thermography. The results show significant differences in terms of thermal comfort between the gloves, proving that LEVEL provides the best thermal comfort for all its products. Thermoplus products values aim to be at least 30% higher than standard gloves.

**LEVEL uses over
30% more
insulation**

**than the average
market products**

**ONLY TOP-QUALITY MATERIALS AND MULTI LAYERS TECHNOLOGY IN ORDER TO REACH
THE HIGHEST INSULATION ON THE MARKET**

THERMAL CERTIFICATION INDEX™ - (TCI)

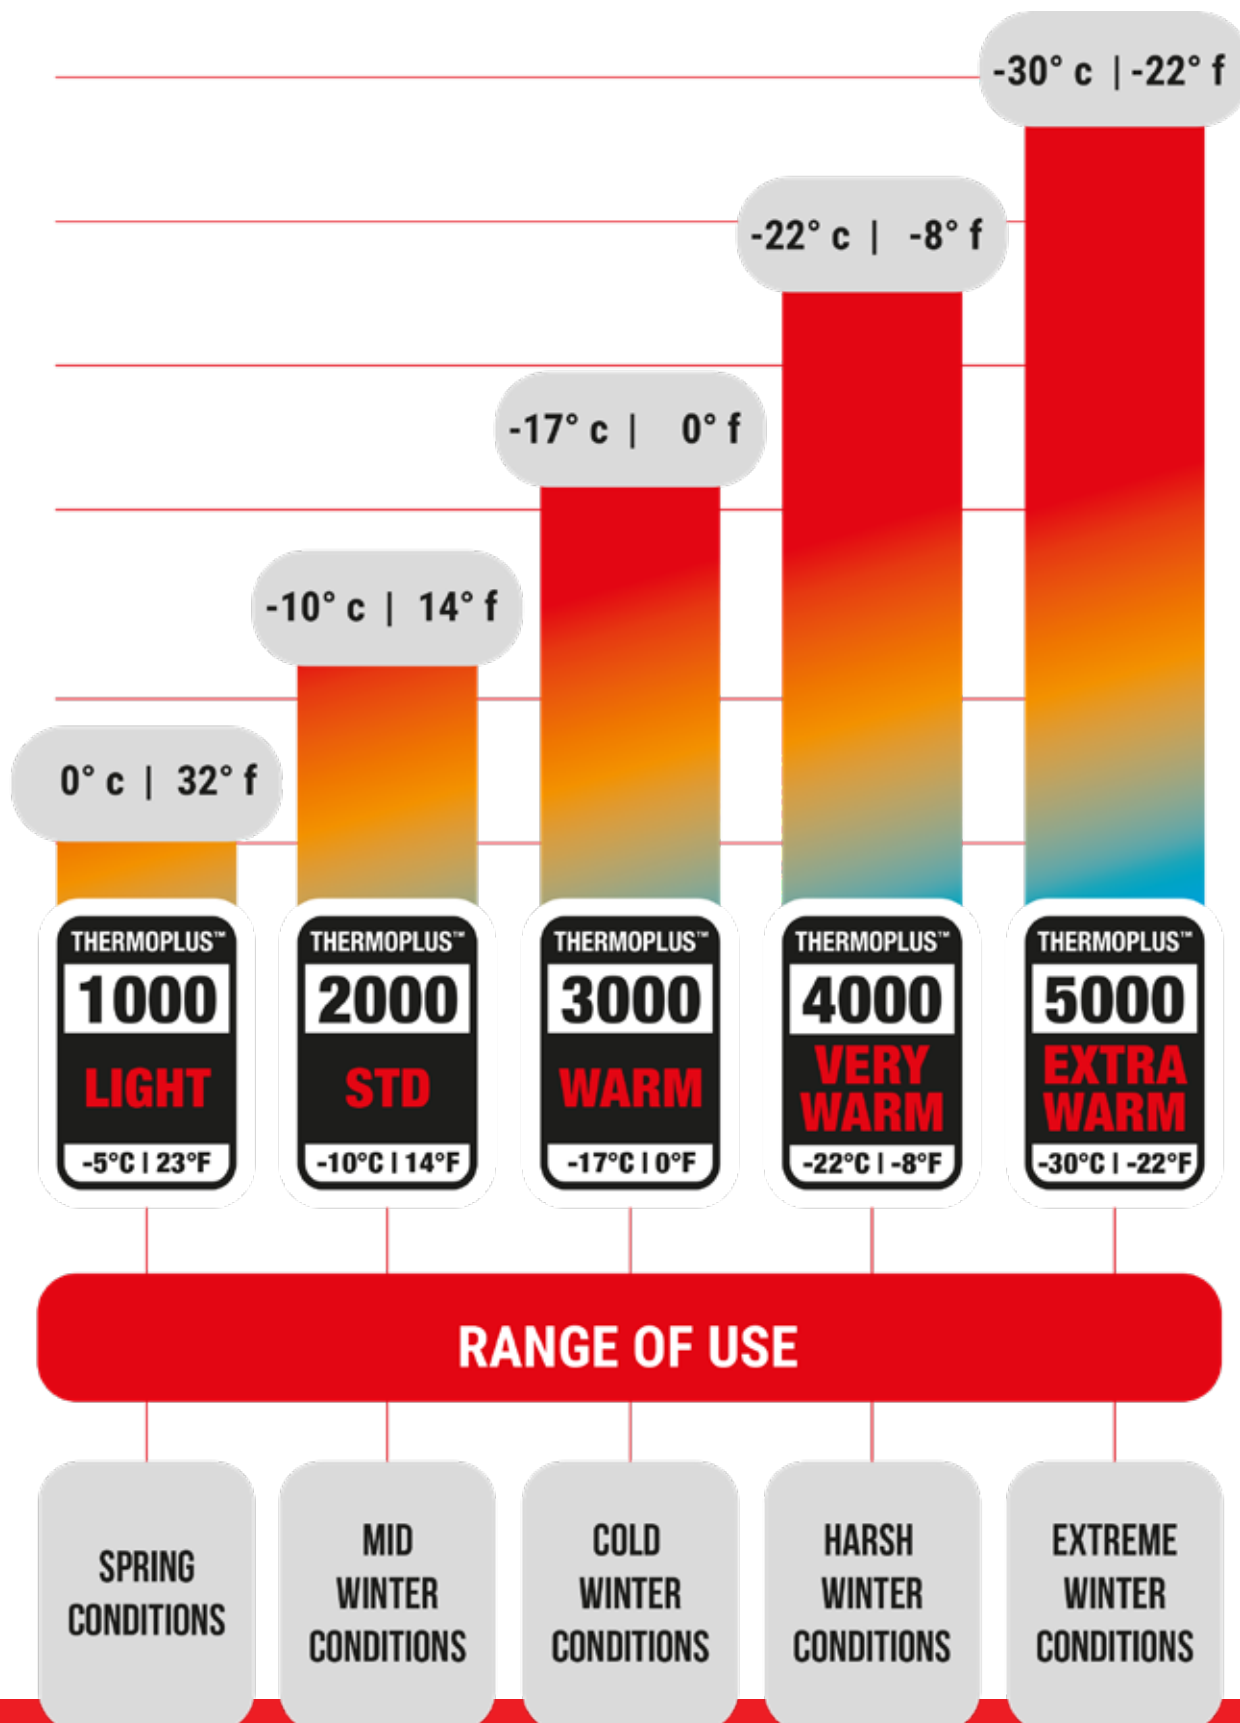

To facilitate the choice of the perfect glove in all weather conditions, LEVEL has developed a 5-level thermal certification index, from cooler to warmer.

**SCIENTIFIC TESTS PERFORMED UNDER THE AUSPICES OF THE DICAM DEPARTMENT OF BOLOGNA
UNIVERSITY - ITALY**

SCIENTIFIC TESTS TO GUARANTEE THE THERMOPLUS CERTIFICATION

The choice of the appropriate material for the construction of gloves is of fundamental importance in order to achieve ergonomic comfort and high thermal insulation. The thermal insulation and the moisture management of gloves made of different materials have been tested both in a climatic chamber and in outdoor conditions using wireless sensors combined with infrared thermography. The results obtained show substantial differences in terms of thermal comfort between the gloves in the same environmental conditions, proving that level provides the best thermal comfort in all of its products.

3 YEARS WARRANTY PROGRAM

LEVEL offers a Limited Warranty against manufacturing defects. LEVEL will repair or replace, at its discretion any products found to be defective within the scope of normal and appropriate utilisation and are within the Limited Warranty covenants which exclude normal wear.

(All Gloves) - Two, (2) or Three, (3), Year Limited Warranty (as specified on the product). LEVEL offers a Two, (2) or a Three, (3), Year Limited Warranty, from the time of initial purchase, against manufacturing defects. LEVEL will repair or replace, at its discretion any products found to be defective within the scope of normal and appropriate utilisation and are within the Two, (2) or Three, (3), Year Limited Warranty covenants which exclude normal wear.

Two, (2), Year Limited Warranty on Beanies, Bags and Ski poles.

LEVEL will repair or replace any of the above-mentioned products from the original purchase date against manufacturer's defects within the scope of normal and appropriate utilisation and within the Two, (2), Year Limited Warranty covenants which exclude normal wear. Claims should be presented at the point of initial purchase with proper documentation to validate claims thereunder.

HOW TO ACTIVATE THE WARRANTY

To activate the warranty please visit </support/online-warranty-registration/> and register your LEVEL product within 14 days from purchase. Please complete all of the required fields to activate your warranty. You can also upload copy of your purchase receipt. If you do not upload a copy of the receipt, please keep your original receipt in the event you have a defective claim for the LEVEL product purchased.

COVER AND EXCLUSIONS

LEVEL warranty covers any type of manufacturing or material fault. With regards to this warranty, any non-conformities of the product with your expectations cannot be considered as faults. The warranty expressly excludes any damages caused by: misuse; normal wear and tear, damages; tampering; incorrect handling of the gloves; negligence or carelessness; damages caused by falls and/or accidents or any alteration due to external causes, including any repairs carried out by unauthorised vendor; damages caused by factors/events outside LEVEL's control; users' subjective assessments, such as comfort and fit; damages caused by prolonged exposure to light and/or heat sources. All coverage under this warranty is void if any modification, change or alteration has been made to the product.

HOW TO USE THE WARRANTY

To activate the warranty, please supply LEVEL with:

- A) the product your warranty claim, through any LEVEL "authorised" point of sale in the country you reside in;
- B) the original purchase receipt; if you did not upload your original receipt during at the time you registered your product.

LEVEL shall check its registration on the levelgloves.com website within the terms stated by these regulations. For any further information, please contact LEVEL Customer Service at warranty@levelgloves.com.

LEVEL reserves the right to check on the fault you are complaining about and to carry out any repair or replacement after said check. If, following LEVEL's check, the fault is not considered a manufacturing or material fault, LEVEL reserves the right to charge the customer for the repair and repair as well as shipping costs.

If LEVEL cannot repair or replace the product or parts of it, LEVEL will make you an offer, taking into consideration the age of the product, for its replacement with the same model or an equivalent model.

HOW TO WARRANTY YOUR LEVEL PRODUCT(S)

1. Scan the QR code and complete all of the required fields to activate your warranty

2. Visit your LEVEL Authorised Retailer.

Bring your LEVEL Product in question with your receipt to where the product was purchased.

CUSTOM FIT

This new unique system gives the opportunity to customize the glove/mitten to the anatomical shape of the hand. The padding is made with a breathable thermo-formable material, that after being heated at 80°C, takes the shape of the skier's hand. This customization process can be repeated as often as wanted. The Custom Fit improves comfort, sensitivity and offers a better grip to the ski-pole handle.

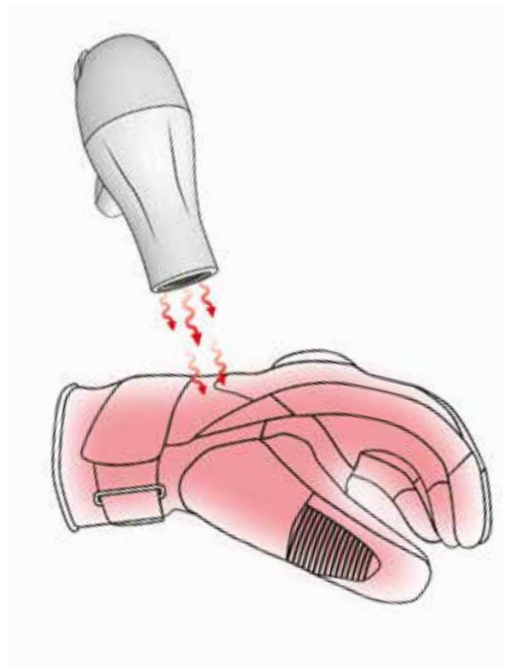

SPECIAL QUALITIES:

- Durable - Warm and comfortable
- Lightweight - Heat Moldable (Thermo-formable)
- Excellent memory
- Low shrinkage when heated, shaped and cooled
- Re-moldable
- High bond strength
- Non-toxic
- Does not absorb water

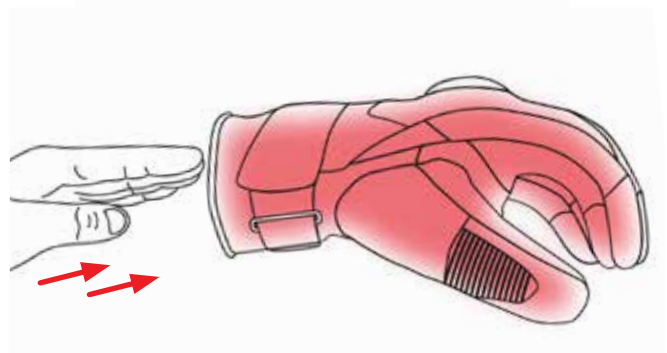

Heat the outside of the glove with a domestic hairdryer at a maximum temperature of 80 degrees at a distance of 30 cm or where available, use the LEVEL oven -

1

Put the glove on, close the strap and let it cool for about 5 minutes -

2

This customization process can be repeated as often as wanted -

3

LEATHERS

With over 20 years of experience in the world of snow sports and ongoing research, LEVEL has always aimed to choose the highest quality fabrics and leathers for their wide range of gloves which are differentiated by thickness and quality specifications for their many uses.

WATERPROOF GOATSKIN:

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

HAIR SHEEP PITTARDS:

A waterproof leather that is exceptionally soft, used especially on the backs of the gloves.

SHEEP SKIN:

A very soft leather used for women's gloves, especially on the back of the hand to give the glove extra softness.

COATED WATERPROOF GOATSKIN:

This leather is used on the palms of freeride gloves, its exceptional waterproof resistance keeps the glove dry and long lasting.

QUARTZ PITTARDS LEATHER:

Pittard leather has a lasercut design providing an extra strong grip in specific points of the palm.

Dragon pittards:

This waterproof goat leather has a design that makes it special and durable. It is used on the palms of snowboard gloves.

KERATAN TREATMENT:

KERATAN is a unique leather treatment designed to significantly increase the abrasion protection and durability of finest performance goatskin leathers. The benefits of KERATAN are: resistance to extreme LEVELs of abrasion, functionality and comfort. The long effective life combined with FireBloc II, can make them flame resistant to the Martindale abrasion test; 45,000 revolutions to hole (average value 1mm thick WR100).

FABRICS

The choice of fabrics is made by our R&D department, in collaboration with top athletes and advice of different stylistic groups from all over the world. We follow the main trends in style and color but keeping as the primary objective fabrics with exclusive features, both in structure and trend that makes them unique and inimitable.

SPRAY TEST:

All LEVEL fabrics are tested with the "spray test" to be approved and certified for maximum water resistance.

POLYGIENE

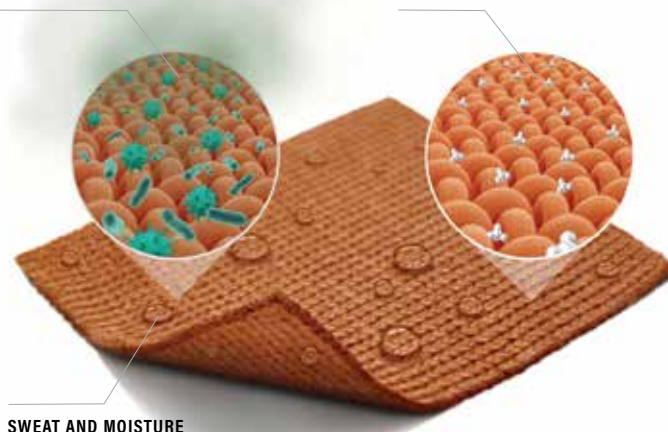

WHAT ARE THE BENEFITS OF POLYGIENE STAYS FRESH TECHNOLOGY?

The silver salt (AgCl, silver chloride) in Polygiene inhibits and guards against the growth of odors from microbes such as bacteria, fungus and mildew.

WITHOUT POLYGIENE BIOSTATIC
ODOR-CAUSING BACTERIA/MICROBES
SETTLE AND MULTIPLY IN MATERIAL

WITH POLYGIENE BIOSTATIC
BIOSTATIC STAYS FRESH TECHNOLOGY INHIBITS
GROWTH OF ODOR-CAUSING BACTERIA

THE POSITIVE EFFECTS FOR YOUR LEVEL GLOVES:

- **STAYS FRESH** Polygiene inhibits the growth of odorcausing bacteria for that fresh-all-day feeling. Odor develops when odor-causing bacteria settles into the fabric, mixes with sweat and multiplies.
- **STAYS HYGIENIC** Polygiene helps prevent odor and prolongs the lifetime of your gloves, since the products are treated to resist deterioration by mold fungus and odor-causing bacteria.
- **HAVE A LIFETIME EFFECT** The treatment will last life- time of the product.
- **BE MORE CLIMATE SMART**

Wear More. Wash Less® Polygiene treated products can be used several times before washing and can be washed at lower temperatures which means that you save energy, water, time and money. Longer lifetime of your gloves – Fibers live longer without bacteria and excessive washing, and treated products are not discarded prematurely due to odor. - Less luggage can be used when traveling. - Recycleable – Polygiene-treated products can be recycled when worn-out. - Polygiene is bluesign® approved – the textile industry's demanding environmental certification with a life-cycle approach.

WHAT IS POLYGIENE AND HOW DOES IT WORK? Polygiene is based on silver salt (silver chloride). Silver chloride is naturally present in water and soil. Polygiene particles have a large amount of silver ions per surface area. Due to the structure of the particles, very small amounts of silver are required for effective treatment. Polygiene is co-applied with other treatments to the fabric during the finishing stage. This helps minimize the impact on the environment because additional energy or water is not required.

ANY EFFECTS WHEN WORN NEXT TO SKIN? Background in the healthcare sector Polygiene has its heritage in the healthcare sector and has undergone extensive skin sensitivity testing. No interference with bacteria naturally occurring on the skin. Polygiene is active only on the material's surface and does not interfere with bacteria naturally found on the skin, even when used for long periods of time. Tests also conclude that there is no identified risk from dermal and oral contact with silver treatments. Polygiene is not nano silver.

Be Climate Smart
Wear More. Wash Less®

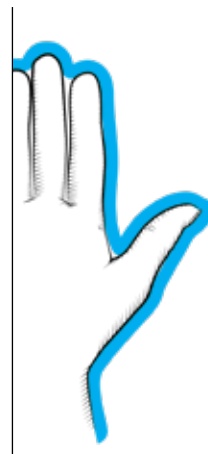

FIT SYSTEM

The close collaboration between R&D and athletes has allowed LEVEL to develop a fit system for skiers and riders that can ensure the best fit for every kind of performance along with maximum comfort. For this reason all the gloves are divided into 3 different fits and are specifically designed for male and female hands.

RELAXED FIT | EXTRA WARM

SKI STYLE: designed for all who love powder with a new cut that allows for a more abundant fit. This new style allows for more protection from the cold while maintaining a good level of sensitivity for the hands.

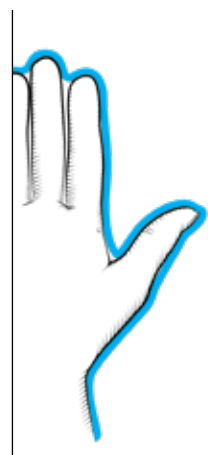

SNOWBOARD STYLE: mainly used in the protection segment line that allows the housing of Biomex, and creating the right balance between warmth and comfort.

NATURAL FIT | VERY WARM

SKI STYLE: designed for skiers that require more warmth and greater comfort. Ensuring the fine balance between precision and sensitivity.

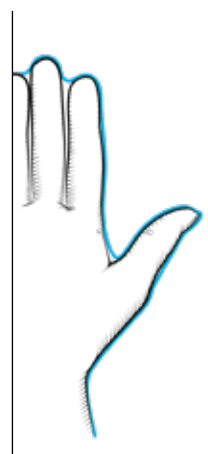

SNOWBOARD STYLE: mainly used as cold weather choice of the LEVEL's pro team. The perfect combination between style, comfort and function.

SLIM FIT | BETTER GRIP

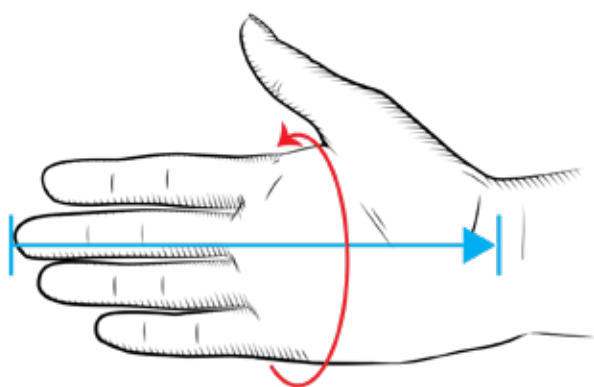

SKI STYLE: for our World Cup athletes who need a perfectly tight fitting glove allowing them to have great feel when holding the ski poles so they can perform their best on the racetrack.

SNOWBOARD STYLE: this is a fashionable product; the better fitting the better the rider can grab their board or freestyle skis. Apart from its tight fit the palm has a special reinforcement to increase the grip.

SIZING CHART

Two things to consider regarding size and measurements of the hand.

HAND LENGTH

With your hand open, measure from the tip of your middle finger, down to the base of the palm drawing a straight line.

HAND CIRCUMFERENCE

With your hand open, measure around the circumference of your hand, at the base of your knuckles.

CHILDREN'S FORM 6 MONTHS UP TO 12 YEARS OLD.

00 size	0 size	I size	II size	III size	IV size	V size	VI size
6-12 Months	1-2 Years	2-3 Years	4-5 Years	5-6 Years	7-8 Years	9-10 Years	11-12 Years

PROTECTION FROM WATER

GORE-TEX GRIP GLOVES

Grip is not just about surface texture on the palm and underside of your fingers—it's also about how your gloves fit. The layers in GORE-TEX Grip Gloves are bonded tightly together so there's no movement between them. That means you can grip your ski poles or work your motorcycle brakes with ease. Better grip also means better confidence, so you can trust yourself to push on.

GORE-TEX PLUS WARM GLOVES

If you're traversing backcountry all day, you want to avoid numb fingers. Even in harsh, cold conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer. With GORE-TEX Plus Warm gloves, you never need to go home early again. They're also totally windproof, breathable and carry our GUARANTEED TO KEEP YOU DRY™ promise.

GORE-TEX ACTIVE GLOVES

The most breathable GORE-TEX gloves available. The whole system of inner lining, GORE-TEX membrane, and outer material is optimized for extreme breathability. Even during intense activity less heat accumulates and more moisture can escape, so your hands stay drier, cooler, and more comfortable.

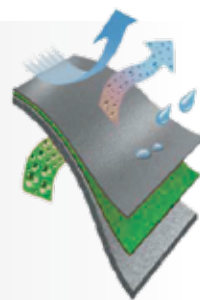

GORE-TEX INFINIUM™ WINDSTOPPER® GLOVES

We have higher standards than most, because we know that wind chill gets to fingers very quickly. The WINDSTOPPER® membrane is rigorously tested to prove it blocks not just some, but all wind. Even if you're trekking against the strongest mid-winter gales, your fingers stay more nimble, and your hands more comfortable.

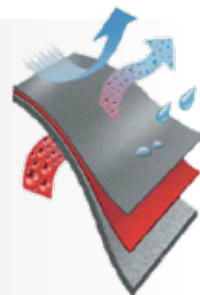

**MEMBRA-THERM
GREEN**
MEMBRA-THERM GREEN

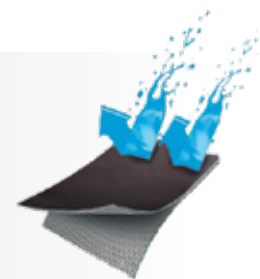

An 100% recycled breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

**MEMBRA-THERM
PLUS**
MEMBRA-THERM PLUS

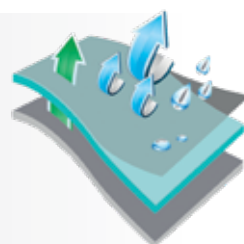

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

**WATERPROOF
LEATHER**
WATERPROOF LEATHER TREATMENT

Special treated leather that withstands tough, outdoor conditions. The leather is waterproofed and its structural properties provide effective protection against moisture.

**waterproof
FABRIC**
WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

INSULATION MATERIALS

GOOSE DOWN

LEVEL products are insulated with exclusive, high-fill power goose down ranging from 550 to 900 fill, which represents the highest quality down commercially available. The down is isolated in small chambers so there is no fill migration; this ensures goose down even distribution and a great insulation performance.

PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

MERINO WOOL

Merino wool lining keeps hands warm and dry and its natural temperature regulating ability is ideal for high performance sports activities.

THINSULATE™

The unique microfibers of Thinsulate™ insulation are ten times smaller than the fibres of other synthetic insulations, which means they're much more efficient at trapping air and keeping in the warmth. It will avoid the formation of cold spots in your hands by filling all the multiple airspaces.

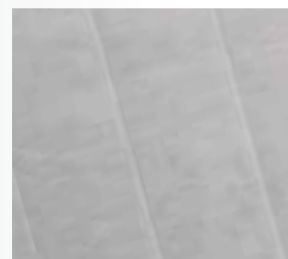

RECYCLED LOFT

This new insulation is made with 100% recycled content, it provides excellent thermal insulation optimizing warmth and comfort.

LOFT PREMIUM

The new LEVEL insulation solution. Soft feeling and thermal benefits together.

POLARTEC®

Polartec® Power Stretch® fabric features 4-way stretch and it is very breathable. It provides warmth without weight. The 4-Way stretch system provides unrestricted freedom of movement. It keeps skin dry even when you sweat, maintains hands warm without the weight and bulk of traditional insulating fabrics and will reduce the effects of wind chill thanks to its fabrics.

SWISS WOOL

This natural material is characterized by thin fibres which do not retain odours making this type of wool antimicrobial. Wool provides warmth and draws sweat away from the skin, keeping a sensation of dryness.

» CATEGORY HIGHLIGHTS

The LEVEL Racing Collection are World Class simply the best available in the market today. The Racing collection has dynamic cutting-edge styles that always deliver the best all-out performance. Racers need warmth as well as protection so materials like wool linings, Superfabric and Dyneema stitching are all utilized. WC and SQ Models can be heated for a "Custom Fit"

» TARGET CONSUMER

Racers of all levels looking for the best experience in the racing world.

RACING

Racing takes the LEVEL spirit into the competition world with its young, dynamic and cutting-edge styles that always deliver the best all-out performances. All new ski models satisfy the highest performance requirements without compromising warmth and comfort.

ICON

CODE: 5012UG | SIZE: XS / XXL

DESCRIPTION: The new Icon of the skiing world. Among the many new models of our Leather Line, the Icon is already an iconic model, developed thanks to the collaboration with the Ski World Champion Aleksander Aamodt Kilde. This product is entirely made of waterproof goat leather, providing extreme softness. Thanks to its construction, the Icon scores 3000 on our Thermoplus index, keeping your hands warm down to -17°C below zero. The inner lining features Polygiene treated silk. This is central to avoiding the formation of bacteria after a long day on your skis. Its design is new and charismatic, with bellows in between the knuckles and the top of the hand. This feature enhances fit and grip for the perfect skiing experience.

WARMTH INDEX: 3000 - Warm

-17° C | 0° F**NEW** DARTH MITT

CODE: 2333UM | SIZE: XS / XL

DESCRIPTION: A robust warm mitten for all skiers. When it comes to simplicity and warmth, the new Darth Mitt is the perfect choice. This waterproof goat leather model is a fantastic companion for long days of skiing, without losing our iconic softness. The Membra-Therm Plus system provides insulation and keeps your hands warm, thanks to the separation between the inner lining and the outer layers. This unisex model comes in three different colour versions, always keeping a simple and iconic design. American Freestyle skier Alex Ferreira partnered with us to create his own Pro Model. This version is the definitive choice for freeskiers and lovers of the backcountry.

WARMTH INDEX: 3000 - Warm

FIT: Relaxed **MATERIAL:** Waterproof goat leather **INSULATION:** Level Loft, Light fleece **DRY TECHNOLOGY:** Membra-Therm Plus **SUSTAINABLE VALUE:** 75% Organic **FEATURES:** Hook&loop closure, Storm leash

05 beige

24 bordeaux

11 red

27 pink

**EMBOSSED DETAILS**

A sleek LEVEL patch with embossed details for an extra touch.

**MEMBRA-THERM PLUS**

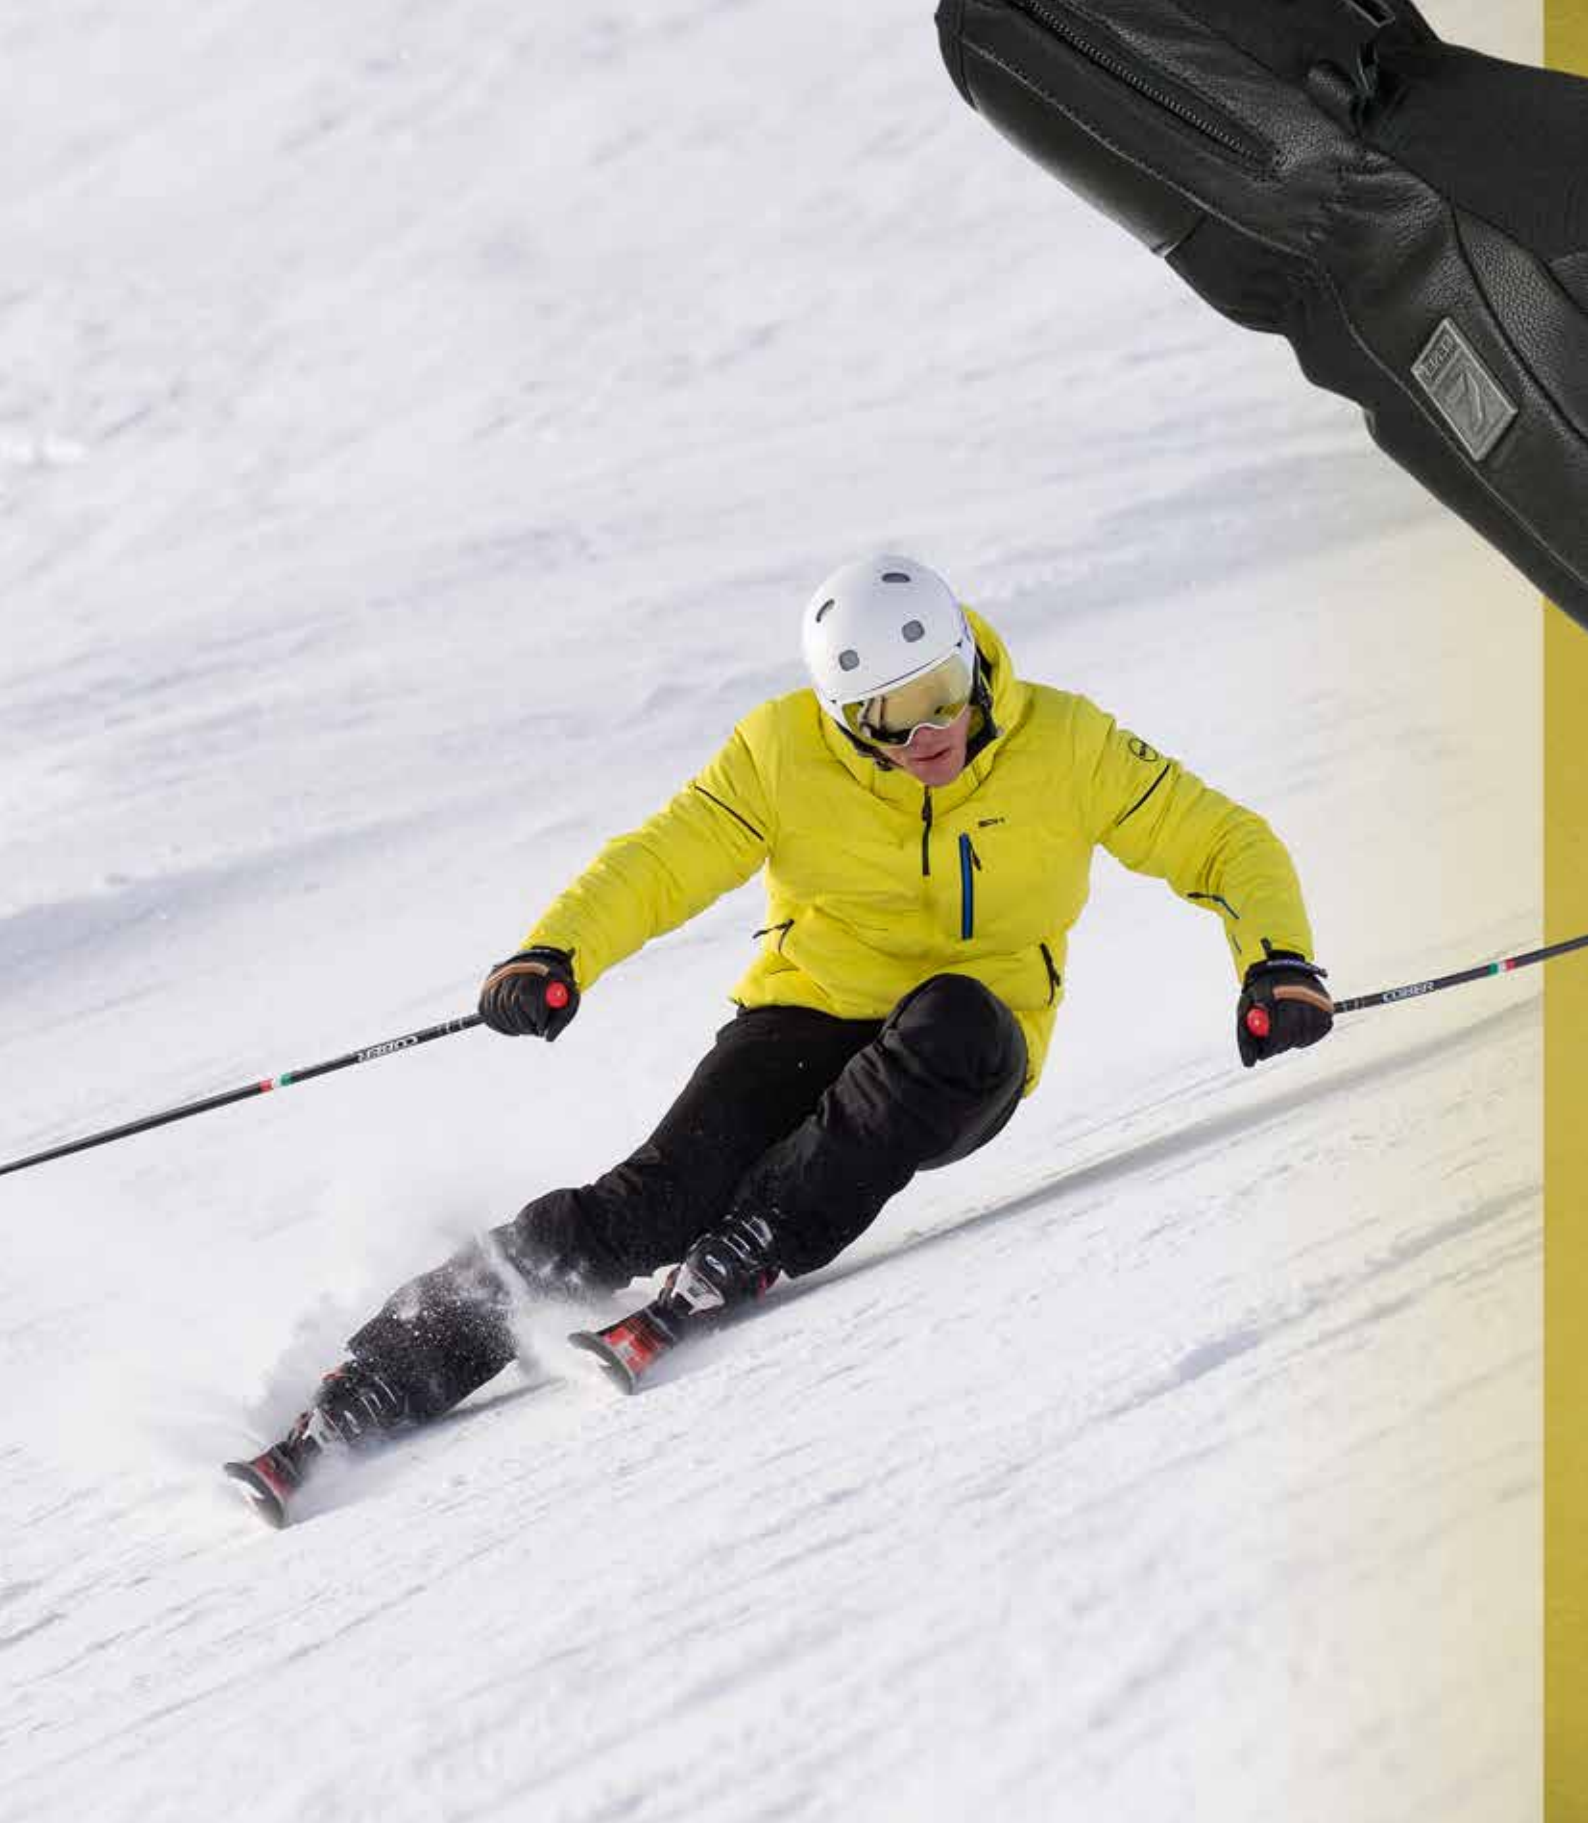

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

**WATERPROOF GOAT LEATHER**

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

**STORM LEASH**

This cord is used to secure the glove to your hand with an adjustable plastic. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

» CATEGORY HIGHLIGHTS

The Alpine line provides exceptional performance, combined with technical features and style. This line offers warmth and function at a great value.

» TARGET CONSUMER

From beginners to advanced skiers, looking for best quality, comfort and great value.

ALPINE

The Alpine line is designed for skiers demanding high-performance, quality materials and elegant lines. Built in years of studies and on-snow testing, this line is proven to be the best call for those who loves carving up the hills.

PEAK

CODE: 3332UG | **SIZE:** 7 (S) / 10 (XXL)

DESCRIPTION: The ideal choice for alpine lovers. This new model in our Alpine Line is designed to offer warmth and safety to skiers who want to enjoy every aspect of high mountain environments. This glove keeps your hand warm thanks to the use of both Multilayer Primaloft and Membra-Therm Plus. These systems work together to maintain the perfect body warmth and to avoid the inner lining getting wet when weather conditions are harsh. The design is solid and original, without getting too flashy. The Peak is available in three different colour versions to offer a wide range to different age groups. Nylon patches are added to the palm to enhance the firmness of the model and provide the perfect grip on your ski poles.

NEW ALPINE

CODE: 3344UG | SIZE: 7 (S) / 11 (4XL)

DESCRIPTION: Past and future: the new Alpine. The Alpine has been redesigned to give a hint of modernity to an already iconic model. Thanks to our recent technological development, it has been possible to preserve the Alpine's performance and use the latest sustainable materials. This model features both Membra-Therm Green and Multilayer Primaloft. Even after a full day of skiing, your hands will be warm, dry and protected. We now use recycled cloths and materials for both the external layers and the inner lining. The palm is also reinforced with leather patches. Playful colours are added to the back of the hands and between the fingers to transform the Alpine into a modern garment for demanding skiers.

NEW • LEGACY

CODE: 3354UG | SIZE: 7 (S) / 10 (XXL)

DESCRIPTION: Green technology for the coldest days of skiing. This new model in our Alpine Line matches technology and a green approach to enjoy the coldest days on the ski slopes. The Legacy is the perfect product for skiers who want to keep their hands always warm and dry. Our new Membra-Therm Green technology separates the inner lining from the external layers to avoid water from wetting the inside of your gloves. In addition, almost all of the materials used to design this glove are recycled. Also, the inner lining uses recycled materials. The hook and loop cuff lets you wear your gloves underneath your ski jacket. The design is classic and sporty, with Level Logo embossed on the back of the hand.

HAWK

CODE: 3373UG | SIZE: 7 (S) / 10 (XXL)

DESCRIPTION: A new green model perfect for all winter sports. The new Hawk has been developed by our R&D Team to create a modern glove with a green footprint. Warmth and comfort are a must, as we do with all our products, but the Membra-Therm Green technology is a new feature. Thanks to this system, it is possible to use a recycled membrane to separate the inner lining from the exterior layers, so your hands are always dry. The palm is made of recycled materials with leather inserts. The design is classic and timeless, with a Level Logo webbing all around the back of the hand. Simplicity and class are now matched in a green glove.

WARMTH INDEX: 2000 - Standard

FIT: Natural **MATERIAL:** Water resistant fabric, Water resistant goat leather palm **INSULATION:** Recycled Level Loft, Recycled Hydrofill **DRY TECHNOLOGY:** Membra-Therm Green **SUSTAINABLE VALUE:** 75% Recycled 11% Organic **FEATURES:** Short cuff, Adjustable strap

SWISS WOOL

This natural material is characterized by thin fibres which do not retain odours making this type of wool antimicrobial. Wool provides warmth and draws sweat away from the skin, keeping a sensation of dryness.

SAFETY STORM LEASH

A new leash concept that offers an increased safety feature for riders and skiers.

POLYGIENE®

With Polygiene® Stays Fresh Technology, enjoy fresh-all-day confidence. Polygiene makes your glove/mitten stay fresh!

PREFORMED SHAPE

This is a special anatomical construction that permits a preformed shape. The preformed shape reduces wrinkles on the palm and guarantees better fit and sensitivity.

MERINO WOOL

Merino wool lining keeps hands warm and dry and its natural temperature regulating ability is ideal for high performance sports activities.

CLOSING SYSTEM

This closing system makes it easy to fit under jackets therefore offering a better closure.

PATROL TRIGGER

CODE: 2094UT | **SIZE:** 7 (S) / 11 (4XL)

DESCRIPTION: Warmth and convenience in a classic of our Mountain line. If you are looking for warm and handy gloves, look no further. The updated version of the Patrol is designed to provide extreme performances down to -17°C below zero, with a 3000 Thermoplus index. The fit is loose to keep the warmth produced by our body thanks to Thinsulate technology. The Membra-Therm Plus system is central to avoid your hands from getting wet, by separating the inner lining from the external layers. This model also features a nose cleaner on the thumb finger and a safety leash to secure the gloves on your wrists. The Patrol comes in three different versions. The five-finger is a solid classic, but the mitt and trigger versions are also available.

WARMTH INDEX: 3000 - Warm

FIT: Relaxed **MATERIAL:** Water resistant micro fabric **INSULATION:** Thinsulate Platinum, Boa fleece inside **DRY TECHNOLOGY:** Membra-Therm Plus **FEATURES:** Safety leash, Long cuff, Adjustable strap, Nose cleaner

01 black

38 pk brown

**MEMBRA-THERM PLUS**

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

**THINSULATE™ PLATINUM**

The unique microfibers of Thinsulate™ insulation are ten times smaller than the fibres of other synthetic insulations, which means they're much more efficient at trapping air and keeping in the warmth.

**ADJUSTABLE STRAP**

This closing system makes it easy to fit under jackets therefore offering a better closure.

**METAL LOGO**

LEVEL metal logo featuring sleek embossed accents. Very glamorous and sophisticated.

NEW SWITCHBACK

CODE: 2090UG | SIZE: XS / XXL

DESCRIPTION: The new model of our Mountain Line is the perfect solution for every weather condition. The Switchback is one of the most advanced and versatile gloves produced by Level in recent years. After careful thought about what is most needed by free-riders, we have developed a model that fits every weather condition. The waterproof external layers are reinforced with leather patches on the palm, enhancing the grip on your ski poles. In addition, our Membra-Therm Plus system guarantees extreme water resistance even after a full day spent in the backcountry. The pouch on the back of the hand comes in handy when the weather conditions move to extremes. You can use it to store thermal bags on the coldest days or open it to freshen up your hands in the first days of spring.

WARMTH INDEX: 3000 - Warm

FIT: Relaxed **MATERIAL:** Water resistant strong fabric, Waterproof goat leather palm **INSULATION:** Thinsulate Platinum, Fleece **DRY TECHNOLOGY:** Membra-Therm Plus **FEATURES:** Storm Leash, Long adjustable cuff, Multi-function pocket

MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

WATERPROOF ZIPPER

Waterproof zipper from YKK, smoother and more flexible, it offers optimum protection with a film-coated tape and an innovative zipper element mechanism.

WATERPROOF GOAT LEATHER

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

MULTIFUNCTION POCKET

Pocket positioned on the top of the glove. May be used to insert hand warmers, ski-pass or other small objects. If unzipped during warm days it allows better air circulation thanks to the inner mesh.

GOAT LEATHER PALM

This tough and protective palm combines woven waterresistant micro fabric and goat leather for both stretch and durability, while a MEMBRATHERM PLUS waterproof and breathable insert keeps intruding moisture at bay.

PULLER

A wider puller inserted in underside of cuff helps to properly wear the glove/mitten

LONG CUFF

Long gauntlet-style glove offers higher insulation and seals out the cold very effectively thanks to a draw cord.

ELASTIC CORD

This elastic cord seals from the outside environment when the snow is deep and the weather is foul. The cuff goes completely over your jacket sleeve and cinch's tight with the cord.

REBEL & REBEL MITT

GLOVE CODE: 2356UG | **MITT CODE:** 2356UM | **SIZE:** XS / XXL

DESCRIPTION: The Freestyle Rebel. The Rebel is one of our most loved products by freestylers. When it comes to extreme winter sports, flexibility is what makes the perfect gloves. Thanks to the use of waterproof goat leather, our R&D Team has managed to develop a model that satisfies even the most demanding skiers. The Rebel, in addition to its extreme comfort, provides the perfect warmth to spend a full day at the ski park. The design is young and iconic. Inspired by the shapes and colours of the American wilderness, this is the perfect choice for freestylers who want to get noticed not only for their skills but also for their style. The Level logo is seared on the back of the hand, giving the ultimate touch to an already iconic glove.

WARMTH INDEX: 2000 - Warm**FIT:** Slim **MATERIAL:** Waterproof goat leather **INSULATION:** Fiberfill, Light fleece **SUSTAINABLE VALUE:** 71% Organic **FEATURES:** Knitted cuff

» CATEGORY HIGHLIGHTS

The Bliss collection was specifically designed by women for women. This Collection is an effort to marry fashion and warmth. Its Warmer, Drier, Softer, Ultra-breathable, Fashionable, and unimaginably comfortable. Several of the models come with a "Warmth Guarantee"

» TARGET CONSUMER

Women of all ages looking for style and fashion even considering warmth and comfort the priority.

WOMEN'S BLISS SIGNATURE

The Bliss line, specially designed by women for women who love snow. LEVEL used its first hand experience as well as input from a diverse group of female riders and skiers to develop a line of women's gloves and mitts unlike any other: warmer, dryer, softer, ultra-breathable, and unimaginably comfortable.

The short under-cuff can easily be tucked into your ski jacket for more agility and less bulk getting in your way of wrist movement.

SILICONE PRINTED PALM

A silicone pattern applied to the palm. Provides excellent waterproofing, improved sensitivity, and exceptional grip.

WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

THERMOPLUS™
1000**LIGHT****DOWN TO**
-5°C | 23°F**NEW** **RUBY****CODE:** 8180WM | **SIZE:** ONE SIZE

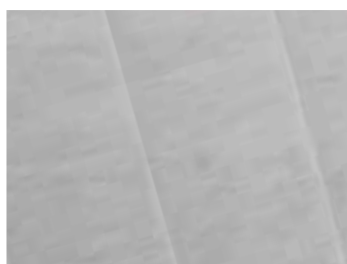

DESCRIPTION: The perfect wrist warmers for the first days of winter. This new model of our Bliss line has been developed for skiers and outdoor lovers. Whether you are taking a walk in the countryside or a stroll through the city centre, the Ruby offers warmth and protection to the lower part of your hands and wrists. It is available in one size and it is extremely easy to carry in your pockets or handbag. The design is young and playful with our Level logo all around the back of the hand. When it is drizzling or lightly snowing, you can protect the upper part of your hands and fingers thanks to the cover stored in the pocket on the back of the hand.

WARMTH INDEX: 1000 - Light**FIT:** Natural **MATERIAL:** Water resistant Polartec fabric **INSULATION:** Level Loft, Lycra fleece **FEATURES:** Cover pocket with zip, Thumb opening**WATERPROOF FABRIC TREATMENT**

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

**THUMB OPENING**

The a fold-back thumb offers freedom of movement when you need it most

**LEVEL LOFT PREMIUM**

The new LEVEL insulation solution. Soft feeling and thermal benefits together.

**WIND HOOD**

The wind hood can easily be attached to an elastic cord at the back of the hand. It creates full protection for the ride down where a Silicone printed palm maximizes the needed grip on your poles.

ALPINE W

CODE: 3345WG | SIZE: 6 (XXS) / 8,5 (M-L)

DESCRIPTION: Past and future: the new Alpine. The Alpine has been redesigned to give a hint of modernity to an already iconic model. Thanks to our recent technological development, it has been possible to preserve the Alpine's performance and use the latest sustainable materials. This model features both Membra-Therm Green and Multilayer Primaloft. Even after a full day of skiing, your hands will be warm, dry and protected. We now use recycled cloths and materials for both the external layers and the inner lining. The palm is also reinforced with leather patches. Playful colours are added to the back of the hands and between the fingers to transform the Alpine into a modern garment for demanding skiers.

NEW NEO JR GTX

CODE: 4192JG | SIZE: 5 (JR S) / 7 (JR XXL)

DESCRIPTION: Gore-Tex waterproofness and Level performance in the perfect gloves for young skiers. This new model combines the very best performance for young skiers who can't resist a fun day on the ski slopes. The warmth provided by these gloves is unparalleled thanks to the use of the latest construction technology and materials. The Neo Jr scored 3000 on our Thermoplus Index, withstanding temperatures down to -17°C below zero. Gore-Tex membrane makes it completely waterproof. The design is youthful and wild. Playful colours and Level Logo perfectly match the spirit of young skiers. The hook and loop cuff makes it easier to wear this model underneath your ski jacket, avoiding cold air and snow from entering your gloves.

WARMTH INDEX: 3000 - Warm

FIT: Natural **MATERIAL:** Water resistant fabric, Leather reinforcement patch **INSULATION:** Fiberfill, Hydrofill **DRY TECHNOLOGY:** GORE-TEX **FEATURES:** Short cuff, Hook&loop closure

06 light blue

15 anthracite

30 fucsia

47 black yellow

GORE-TEX INSIDE

If you want to spend the whole day out, you want to avoid numb fingers. Even in harsh, cold conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer.

WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

ADJUSTABLE STRAP

This closing system makes it easy to fit under jackets therefore offering a better closure.

REINFORCED LEATHER PALM

Abrasion-resistant goat leather patches on palm and thumb finger for both stretch and durability.

MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

GOOSE DOWN

High-fill power goose down represents the highest quality down commercially available. The down is isolated in small chambers so there is no fill migration; this ensures goose down even distribution and a great insulation performance.

REINFORCED LEATHER PALM

Abrasion-resistant goat leather patches on palm and thumb finger for both stretch and durability.

PREFORMED FINGERS

This is a special anatomical construction that permits a preformed shape. The preformed shape reduces wrinkles on the palm and guarantees better fit and sensitivity.

-17° C | 0° F**NEW** **VERTIGO MITT TEEN****CODE:** 2375JM | **SIZE:** 4 (JR S) / 8 (JR XXL)

DESCRIPTION: The perfect mitten for young free-riders. Design, warmth and durability are the main features of the perfect mitten for young free-riders and snowboarders. Very similar to its adult version, the Vertigo Jr has been designed to provide the best possible thermal resistance. With a Thermoplus 3000 index, this model can keep your hands warm down to -17°C below zero. The Membra-Therm Plus system keeps your hands not only warm but also dry, thanks to the separation of the inner lining from the external layers. The design is unique and cannot go unnoticed. We collaborated with American freestyle skier Alex Ferreira to develop his Pro Model version.

WARMTH INDEX: 3000 - Warm

FIT: Natural **MATERIAL:** Water resistant strong fabric, Waterproof goat leather palm **INSULATION:** Fiberfill, Fleece **DRY TECHNOLOGY:** Membra-Therm Plus **FEATURES:** Short cuff, Hook&loop closure, Safety leash

» CATEGORY HIGHLIGHTS

Protection was how LEVEL was first launched over 30 years ago. The exclusive Biomex-Plus System has been renewed with new self-adjustment, and still has many applied technologies. The specific research efforts has allowed LEVEL to devise a special inner glove system to increase protection for the wrist in snowboarders.

» TARGET CONSUMER

Snowboarders from beginners to top athletes looking for the best hand protection products available on the market.

PROTECTION

The exclusive Biomex-Plus System, renewed with new self-adjustment is just one among the many applied technologies. The research partnership with the Klinik Gut of St. Moritz has allowed LEVEL to devise a special inner glove system to increase protection for the wrist in snowboarders.

23.24 COLLECTION

BIOMEX WRIST PROTECTION

CONTROL BOARD - TÜV SÜD PRODUCT SERVICE GMBH

It's all about pushing the limits. LEVEL gloves with Biomex wrist protection can help you stay in one piece...So you'll be riding tomorrow instead of seeing the doctor. LEVEL's proven Biomex wrist protection system is the result of an extensive and on-going collaboration between snowboarders, the medical community, and engineers who understand bio-mechanics. Biomex research and development is based at the Klinik Gut, center of bone and joint surgery in St.Moritz, Switzerland, where LEVEL pros and physicians design and develop the most advanced wrist support technology on the market – the Biomex Plus. For beginners, the most frequent cause of a wrist fracture in snowboarding is a backwards fall. For more experienced riders it's a front and sideways fall. There are many wrist guards on the market, but based on their design, they don't all deliver the same degree of safety performance.

SNOWBOARD PROTECTION

SINGLE DENSITY MATERIAL + PAD

SINGLE DENSITY MATERIAL

NEW ERGONOMIC SHAPE FOR BETTER COMFORT AND EASE OF MOVEMENT

THE BIOMEX SYSTEM CAN BE USED WITH OR WITHOUT REMOVABLE LINING THANKS TO ITS SELF ADJUSTMENT MESH FOUND ON ALL VERSIONS.

SPECIFIC WOMEN'S FIT

Snowboard protection specifically designed for women's hands for improved fit and comfort

FREESKI BIOMEX EVOLUTION

Specific designed for skiers, shorter and harder material, it is attached to the lining and fits anatomically to the hand.

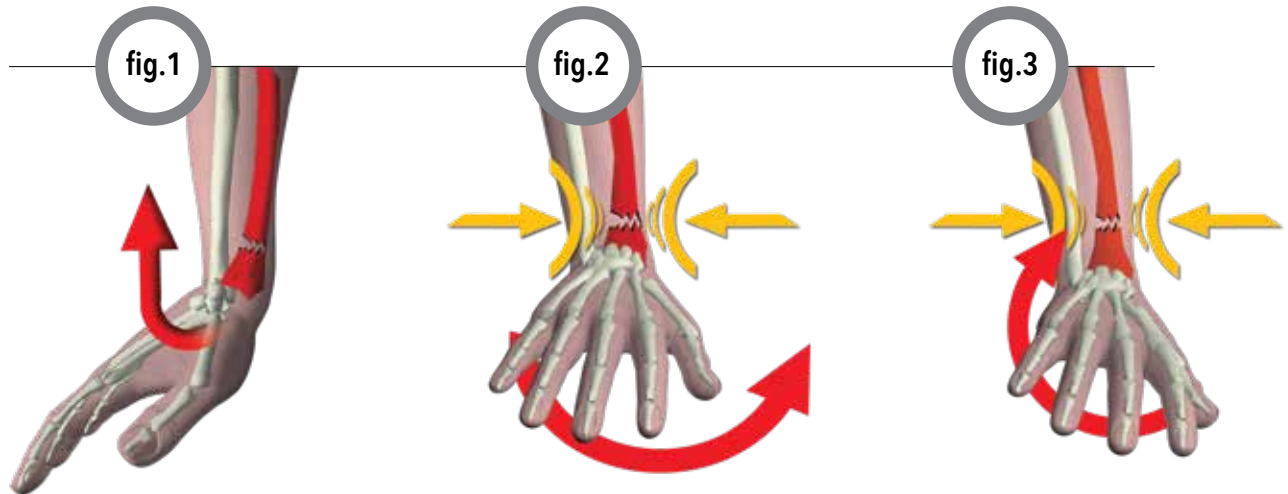

BIOMEX
PROTECTION

HOW DO YOU GET HURT?

During a fall your wrist is put in hyper extension (fig.1) (The back of hand is pushed towards the forearm). In addition to this hyper extension, the wrist often experiences two types of twisting forces technically referred to as pronation (fig.2) and radial adduction (fig.3).

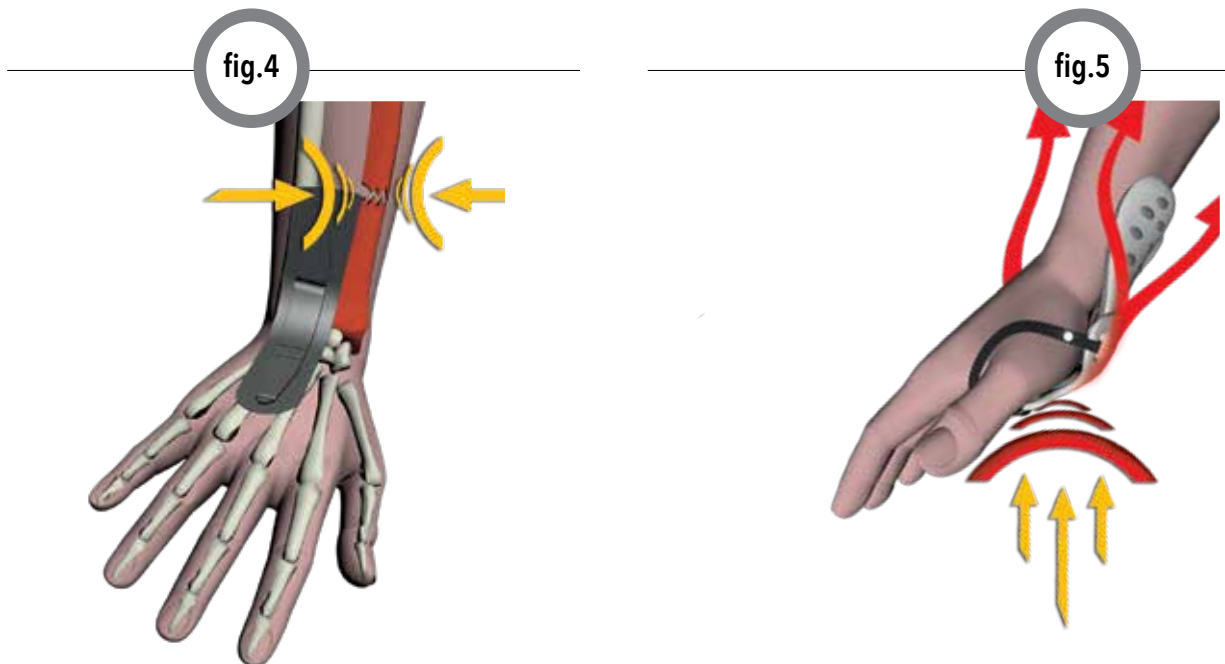

It's the combination of these three forces that most often causes a wrist injury such as a wrist fracture.

WHY IS BIOMEX A BETTER WRIST GUARD?

Most wrist guard systems deal with hyper-extension alone, but the Biomex system addresses all three of the forces that contribute to wrist injury. Standard wrist guards frequently push the fracture further up the forearm (fig.4).

Biomex (fig.5) is the only wrist guard that keeps the wrist in an anatomically strong position, where muscle forces and bone congruency combine to provide optimum stability without compromising the freedom to move.

HELPS TO REDUCE INJURIES BY 7,5 TIMES WITH BIOMEX PLUS

WARMTH INDEX: 4000 - Very Warm

FIT: Relaxed **MATERIAL:** Superfabric, Kevlar reinforcement **INSULATION:** Knitted brush inside **DRY TECHNOLOGY:** GORE-TEX **HIGHLIGHTS:** BIOMEX® Protection + Pad, Shock Absorber on palm **FEATURES:** Long cuff, Adjustable strap, Powder cuff, Storm leash, Boa & Fleece removable lining, Breathable system

01 black

GORE-TEX INSIDE

If you want to spend the whole day out, you want to avoid numb fingers. Even in harsh, cold conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer.

BIOMEX® PROTECTION + PAD

New ergonomic shape for better comfort and ease of movement. The BIOMEX SYSTEM can be used with or without removable lining thanks to its self adjustment mesh found on all versions.

SUPERFABRIC®

SuperFabric® is a material that's longer lasting, has higher durability, and is designed for everything from extreme applications to rugged daily usage.

GOGGLE & NOSE CLEANER

The mini goggle squeegee helps to easy-clean your lenses. The special velvet fabric on the thumb provides a soft place to wipe your runny nose.

SAFETY LEASH

This cord is used to secure the glove to your hand with an elastic strap. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

BREATHABLE SYSTEM

An air exchanging vent is placed on the back of the glove allowing moisture to escape. This improves the drying time of the glove and avoids hands getting wet.

If you want to spend the whole day out, you want to avoid numb fingers. Even in harsh, cold conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer.

BIOMEX® PROTECTION + PAD

New ergonomic shape for better comfort and ease of movement. The BIOMEX SYSTEM can be used with or without removable lining thanks to its self adjustment mesh found on all versions.

SAFETY LEASH

This cord is used to secure the glove to your hand with an elastic strap. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

BREATHABLE SYSTEM

An air exchanging vent is placed on the back of the glove allowing moisture to escape. This improves the drying time of the glove and avoids hands getting wet.

GOGGLE & NOSE CLEANER

The mini goggle squeegees helps to easy-clean your lenses. The special velvet fabric on the thumb provides a soft place to wipe your runny nose.

REMOVABLE LINER

A removable lining where the back of the lining is built with a hot thick material whilst the palm is thinner to maintain sensitivity. The removable liner can be removed and washed.

THUMB PROTECTION SYSTEM

In skiing they are reported to be the second most frequent injury after the knee. In detail thumb injuries are reported to make up between 5% - 20% of all injuries in Alpine skiing and are sustained by approximately 80,000-240,000 patients per year world wide.

The Ski Thumb is an injury affecting the ulnar collateral ligament (UCL) at the metacarpophalangeal joint of the thumb. The mechanism is due to the forces which are applied when a skier falls with the pole in his/her hand.

The handle of the pole will act as a fulcrum applying forces across the joint and thereby putting the ligament under strain. The skier hits the surface with high velocity (high energy trauma). If the hand is stretched out as a natural reflex, there is a significant chance that the thumb will be forced outwards resulting in a fracture of the UCL.
